SMART ROOM SOLUTION

Streamline How You Manage Bank Branch IT & Assets

For Bank Branch IT Rooms

The IT rooms at your bank branches are critical to your business, customer happiness and employee productivity.

Stay Compliant, Avoid Fines

Slow and manual asset audits and poor inventory accuracy drive non-compliance and risk exposure, which can lead to significant fines.

Automate asset audits and tracking in real time, including hard drive disposal, to protect data and avoid unnecessary expenses.

Prevent Outages, Save Money

Surprise outages and unnecessary IT support site visits impact customers, decrease employee productivity, and cost money.

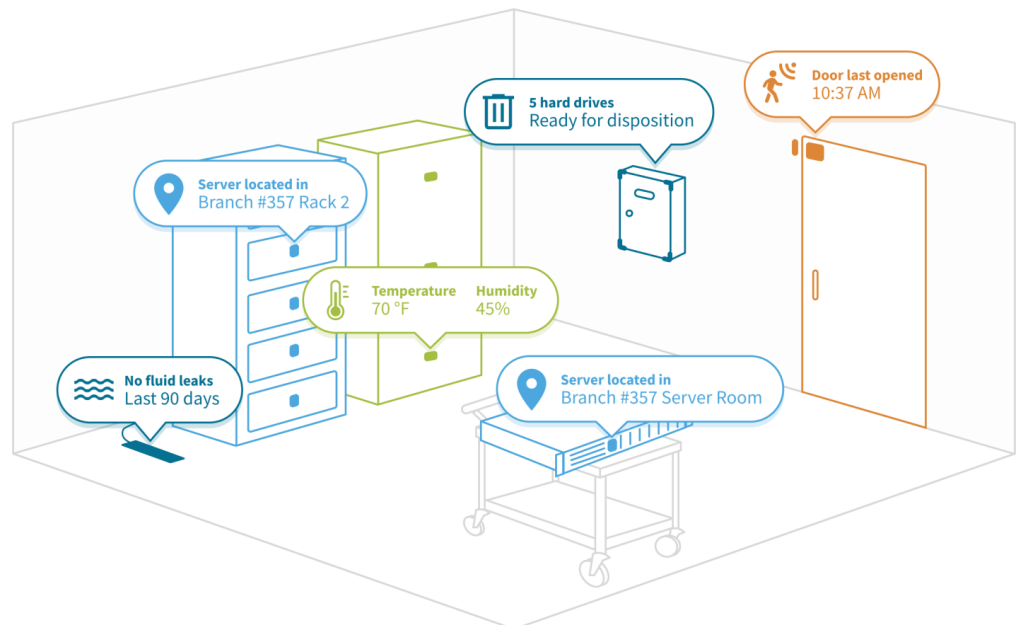

The solution monitors what is happening inside every IT room, better than being there, to help prevent issues becoming outages.

USA Designed and Assembled

The Smart Room solution for bank branches is designed and assembled in Austin, Texas.

Upgrade your bank branch IT room to a **Smart Room**

Work smarter to serve customers better, protect data and boost compliance.
